

CONSERVATION EDUCATION INTERNSHIPS

The Conservation Education Department of the Racine Zoo is dedicated to promoting awareness of conservation issues through engaging, educational, and entertaining zoo experiences. Racine Zoo interns are valuable members of our team.

A Conservation Education Intern will assist the Conservation Education Department in fulfilling the educational mission of the Zoo. This person will assist with such tasks as Zoo camps, performing educational outreach animal encounters both on and off campus, conducting guided tours of the Zoo, Slumber Safari zoo sleepovers and delivering animal chats and presentations. Interns will also be responsible for assisting with signage and interactive displays, program development and research. Interns will work with a variety of animals (small mammals, reptiles, amphibians, birds, and arthropods). Interns are required to complete a project that benefits the Zoo and is completed during the internship period. Interns are supervised by Conservation Education staff. Internships may be completed for college credit based on the college's guidelines.

Qualifications: Candidates must have completed one year of a college degree program in biology, animal behavior, zoology, education, or other related field. Candidates must also have excellent communication skills, enjoy working with people of all ages, and be able to work in a team environment. They must be self-motivated, reliable, prompt, able to lift 50 pounds, and able to work in all weather conditions. Internships are experience-based and are therefore unpaid (housing is also not provided). It is required that an intern dedicates 24 hours per week over the course of three months, or 288 total hours (schedules may be flexible based on the candidate's availability).

To apply, please send cover letter, resume, and a list of three references to:
